I am an over the road truck driver. I depend upon my xm radio to give me up to the minute weather reports at the touch of a button. I don't have time to try to find all of the local channels to get the local weather and traffic conditions. It has helped me to avoid some really bad weather and traffic backups. I wouldn't be without it. my regular radio does not give me the extra things that my xm can. I enjoy being able to listen to the kind of music that I want when I want and not worry about fumbling for a station that I will lose in ten miles. There are a lot of better things that the government could be worrying about rather than what people are listening to. thank you.
